Features: This belt features an exceptionally soft EPDM compound with molded grooves that self clean when going around pulleys. The monofilament carcass insures a flat performing belt. The EPDM compound prevents glazing and retains tackiness over time. E2G Mono-Tote-EPDM is a leader in the movement of totes and letters in the Post Office. It is recommended in applications to move any product where a sticky surface is needed. It can also be used on strapping machines.
