6-1001: Medium Single Leather

Color: Tan

Plies: 1

Nom. OAG: 0.156" +/- 0.03"

Fabric: None

Top Surface: Smooth

Bottom Surface: Friction Surface

Compound: Leather

Elongation: Less than 4%

Weight: 0.06 lbs./PIW

Minimum Pulley: 2.5"

Working Temp. (F): 20 to 180

Features: Leather is preferred for some applications because of its combined characteristics of high tensile strength, high coefficient of friction and great flexibility. It also has good oil resistance. This is the belt your Great-Grand-Daddy used to use. Leather belting is primarily used in specialty power transmission applications.
