

## 6-1001: Medium Single Leather

Color: Tan Minimum Pulley: 2.5"

Plies: 1 Working Temp. (F): 20 to 180

**Nom. OAG:** 0.156" +/- 0.03"

Fabric: None

Top Surface: Smooth

**Bottom Surface:** Friction Surface

**Compound:** Leather

**Elongation:** Less than 4%

Weight: 0.06 lbs./PIW

**Features:** Leather is preferred for some applications because of its combined characteristics of high rensile strength, high co-efficient of friction and great flexibility. It also has good oil resistance. This is the belt your Great-Grand-Daddy used to use. Leather belting is primarily used in specialty power transmission applications.
