6-3000: 10 Mil Teflon/Fiberglass

Color: Tan

Plies: 1

Nom. OAG: 0.01"

Fabric: Fiberglass

Top Surface: Smooth Teflon

Bottom Surface: Smooth Teflon

Compound: PTFE (Teflon)

Work Tension: 250 lbs./PIW

Elongation: Less than 1%

Weight: 0.01 lbs./PIW

Working Temp: -200 to 550 °F

Features

This PTFE-coated fiberglass belt is engineered for extreme heat resistance and non-stick performance. The surface provides clean release properties, making it ideal for continuous processes where adhesive buildup and product sticking must be avoided.

The belt's construction maintains dimensional stability under high temperatures, and its strength-to-weight ratio supports smooth motion through ovens, dryers, shrink tunnels, and thermal-processing lines.

This specification is commonly used in food processing, packaging, bag manufacturing, and other heat-intensive applications where a non-adhesive, temperature-resistant conveyor surface is essential.
