HAL-12E: HAL-12E ** Habasit **

Color: Green

Plies: 2

Nom. OAG: 0.1" +/- 0.01"

Fabric: Polyester

Top Surface: Longitudinal Groove

Bottom Surface: Bare

Work Tension: 114 lbs./PIW

Weight: 0.043 lbs./PIW

Minimum Pulley: 1.9"

Working Temp. (F): -22 to 212

Features: This belt features an exceptionally soft compound with molded grooves that self clean when going around pulleys. The EPDM compound makes this belt one of the best longitudinal groove products on the market. This belt is anti-static. HAL-12E is an excellent general conveying belt in applications such as tote conveying and paper manufacturing and processing. Suitable for both incline and decline applications.
