

SI - CLEATS

Designed for steep incline applications exceeding 45 degrees, the "SI" cleat forms a **BUCKET** shape when paired with sidewalls—providing secure and efficient material containment where the Scoop cleats may fall short.

Steep Incline Performance

SI Cleats are engineered for applications over 45° where Scoop cleats fall short. Their unique profile creates bucket-style pockets ideal for material containment on steep slopes.

Reinforced For Demanding Loads

SI Cleats can be bolted to sidewalls to maintain pocket integrity and prevent capacity loss. Cleats 5.5" and above feature fabric reinforcement to withstand heavy loads and high impact.

Material Control & Pocket Design

Ensure each cleat pocket can handle your required TPH—twice the volume of the largest lump being conveyed for complete material containment.

Why Buy From Mulhern Belting?

- ✓ Proudly Distributor Driven
- ✓ Drop Ship Program
- ✓ Application Expertise
- ✓ Instant Communication
- ✓ Large In-house Inventory
- ✓ Competitive Pricing
- ✓ High Quality Product
- ✓ On Time Delivery

**Our High Quality
Cross Rigid Belt &
Sidewall options are
also available!**
