MULHERN BELTING, INC.

Part #5-4802
4 Ply 440 1/4 X Bare MOR

Specs:

Color:
Black

Nominal OAG:
.500 +/- .030"

Cover Thickness:
1/4"

Plies:
4

Fabric:
Polyester/Nylon

Minimum Pulley:
20"

Top Surface:
Smooth

Bottom Surface:
Bare

Compound:
MOR

Working Tension:
440 lbs. PIW

Elongation:
Less than 4%

Weight PIW / Ft:
.200 lbs./PIW

Working Temp:
-20F to 225F

Joining Method:
Lap splice/Lacing

5-4802 features a thick, abrasion-resistant top cover with a bare bottom suitable for slider-bed systems. Its MOR compound offers added protection against oily or resin-based materials.

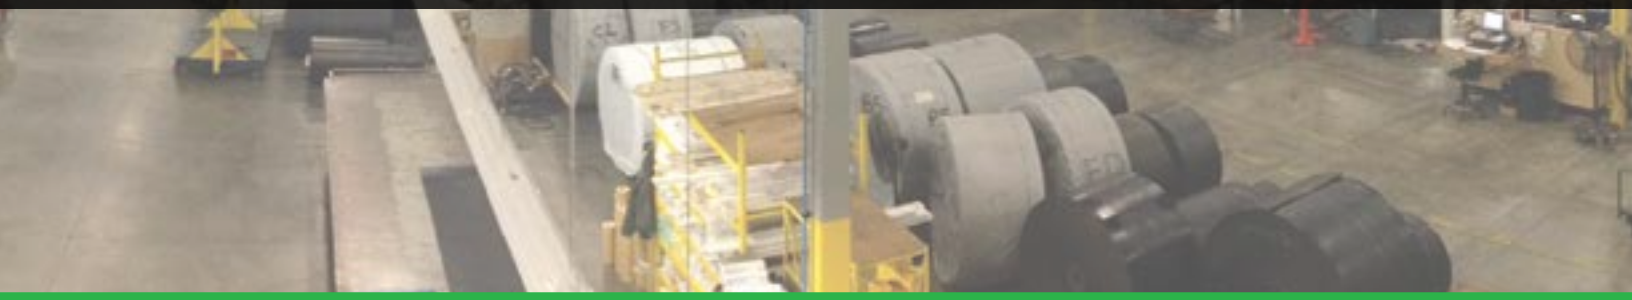

The 440 1/4" × Bare MOR construction performs well in recycling plants, glass handling, and other demanding industrial settings requiring a rugged slider-bed belt.

Why Buy From Mulhern Belting?

- ✓ Proudly Distributor Driven
- ✓ Large In-house Inventory
- ✓ Drop Ship Program
- ✓ Competitive Pricing
- ✓ Application Expertise
- ✓ High Quality Product
- ✓ Instant Communication
- ✓ On Time Delivery

Available Oil Resistant Compounds from Mulhern Belting

MOR belts are designed for light to intermittent oil exposure, using an SBR/NBR blend to reduce swelling and softening compared to standard rubber. This compound is a cost-effective upgrade for applications where occasional oils, greases, or treated materials are present.

SOR belts feature high-content NBR (nitrile) compounds engineered to withstand continuous and heavy oil exposure without degradation. These belts are ideal for demanding environments where long service life and dimensional stability are critical.

SCORF belts combine oil resistance, fire retardancy, and static conductivity into a single compound for hazardous conveying environments. They are commonly specified for applications where safety compliance and oil resistance are equally essential, such as mining, coal handling, and grain elevators.
